RE: Former Rose City Cleaners Site (Thomasville National Bank)
Thomasville, Georgia
HSI Site #10902

Dear Mr. Brownlee:

PEACHTREE ENVIRONMENTAL (Peachtree) appreciates the time that you and Yue Han spent with us and Thomasville National Bank (TNB) personnel during our recent meeting on February 16, 2017. As we discussed, Peachtree will propose a risk-based approach in accordance with Georgia Volunteer Remediation Program (VRP) rules to address the conditions on the TNB property and affected down-gradient parcels. The proposed components of the risk-based approach will be presented in the 9th Semiannual Progress Report, which will be submitted on or before July 1, 2017.

Please feel free to contact either of the undersigned if you have any questions or require additional information.

Respectfully submitted,

Larry Carter, PG
Project Manager

John P. Martiniere, Jr., PE
Project Director
